

**Gregory Rupert, P.E., C.E.M.**  
**Principal**

---

*B.S. Mechanical Engineering  
Georgia Institute of Technology*

*Certified Energy Manager (CEM)*

*Registered Professional Engineer  
in the following States:*

- California
- Florida
- Georgia
- Mississippi
- North Carolina
- Oregon
- South Carolina
- Tennessee
- Texas
- Virginia

Greg has worked in the energy management field for sixteen years. He began his engineering career with Goody Products where he served as a plant engineer and project manager. In this role, he managed cost reduction projects that included automation, scrap and waste reduction, and energy conservation. Following this position, Mr. Rupert worked as the engineering manager for Public Energy Partners. Through this joint venture of the Municipal Gas Authority of Georgia and the Municipal Electric Authority of Georgia he assisted local governments manage their energy use and cost.

Today, Greg provides energy engineering services to industrial and commercial clients throughout North America. He has worked with hundreds of industrial, commercial, and governmental facilities to develop and implement energy efficiency projects.

#### **Relevant Experience**

- Extensive knowledge and experience in numerous commercial and industrial systems and process support equipment including chillers, boilers, air compressors, vacuum systems, HVAC, lighting, and motors & drives.
- Conducted over 75 domestic water and wastewater plant efficiency studies and system upgrade projects, for various municipals in the Northwest United States.
- Greg also specializes in the area of utility rates, rebate programs, and federal incentive programs. He has worked with hundreds of commercial and industrial clients to select and negotiate appropriate rates and has developed and presented numerous workshops and courses on the subject.
